OF

BUILDERS' HARDWARE

HAMMACHER, SCHLEMMER & CO.

209 BOWERY, NEW YORK, SINCE 1848

CABINET, REFRIGERATOR AND PIANO HARDWARE, FACTORY SUPPLIES, TOOLS FOR ALL TRADES

NOTICE.

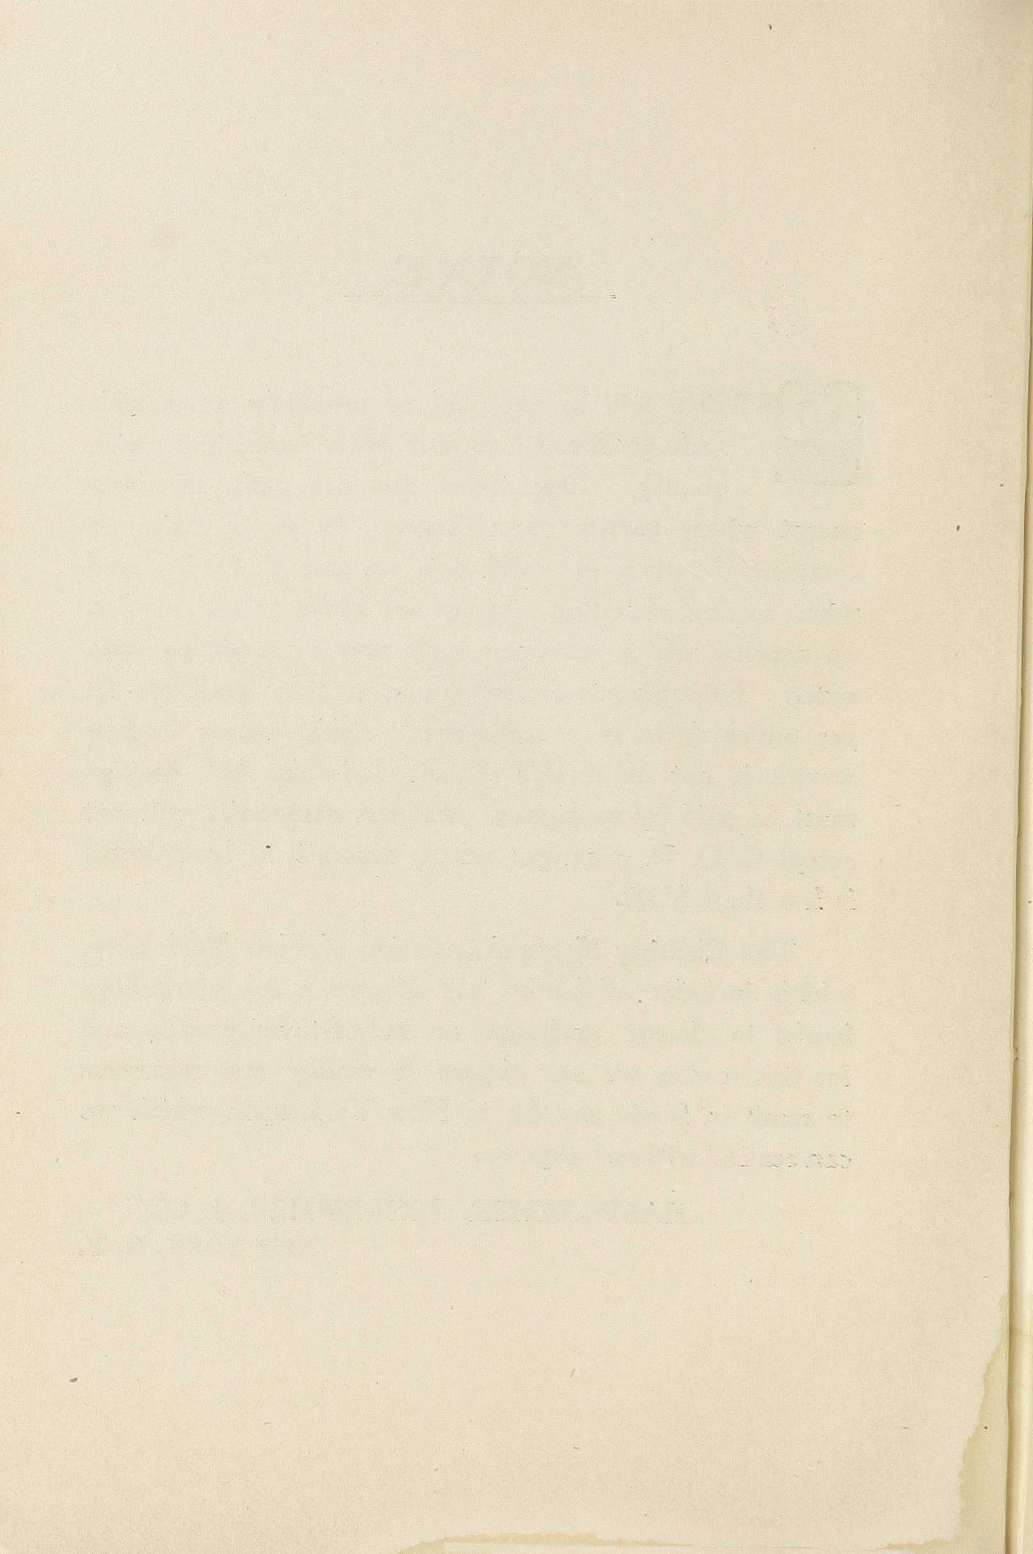

ORDERS will be executed as promptly as possible and at lowest current rates consistent with quality. Our terms are net cash, 30 days, except where parties are unknown to us or have no commercial rating, in which case we ship C. O. D., and when so sent collection charges are added to the invoice, an expense which customers may save by remitting with order. Four pounds or less can be sent by mail for 1c. per ounce (always at consignee's risk), where express service is not obtainable or not desirable, but postage must be paid by consignee. Express companies will not accept C. O. D. packages where amount to be collected is less than \$1.00.

The Clearing House Association of New York City, which includes all banks, has adopted a rule compelling banks to charge exchange on out-of-town checks, and for this reason we are obliged to require our customers to remit in funds payable in New York upon which we can realize without expense.

HAMMACHER, SCHLEMMER & CO.

NEW YORK, N. Y.

BEFORE YOU ORDER

study carefully all details enumerated in the catalogue, particularly as to complete numbers and finish, also design, if special.

Any point omitted necessitates correspondence and loss of time.

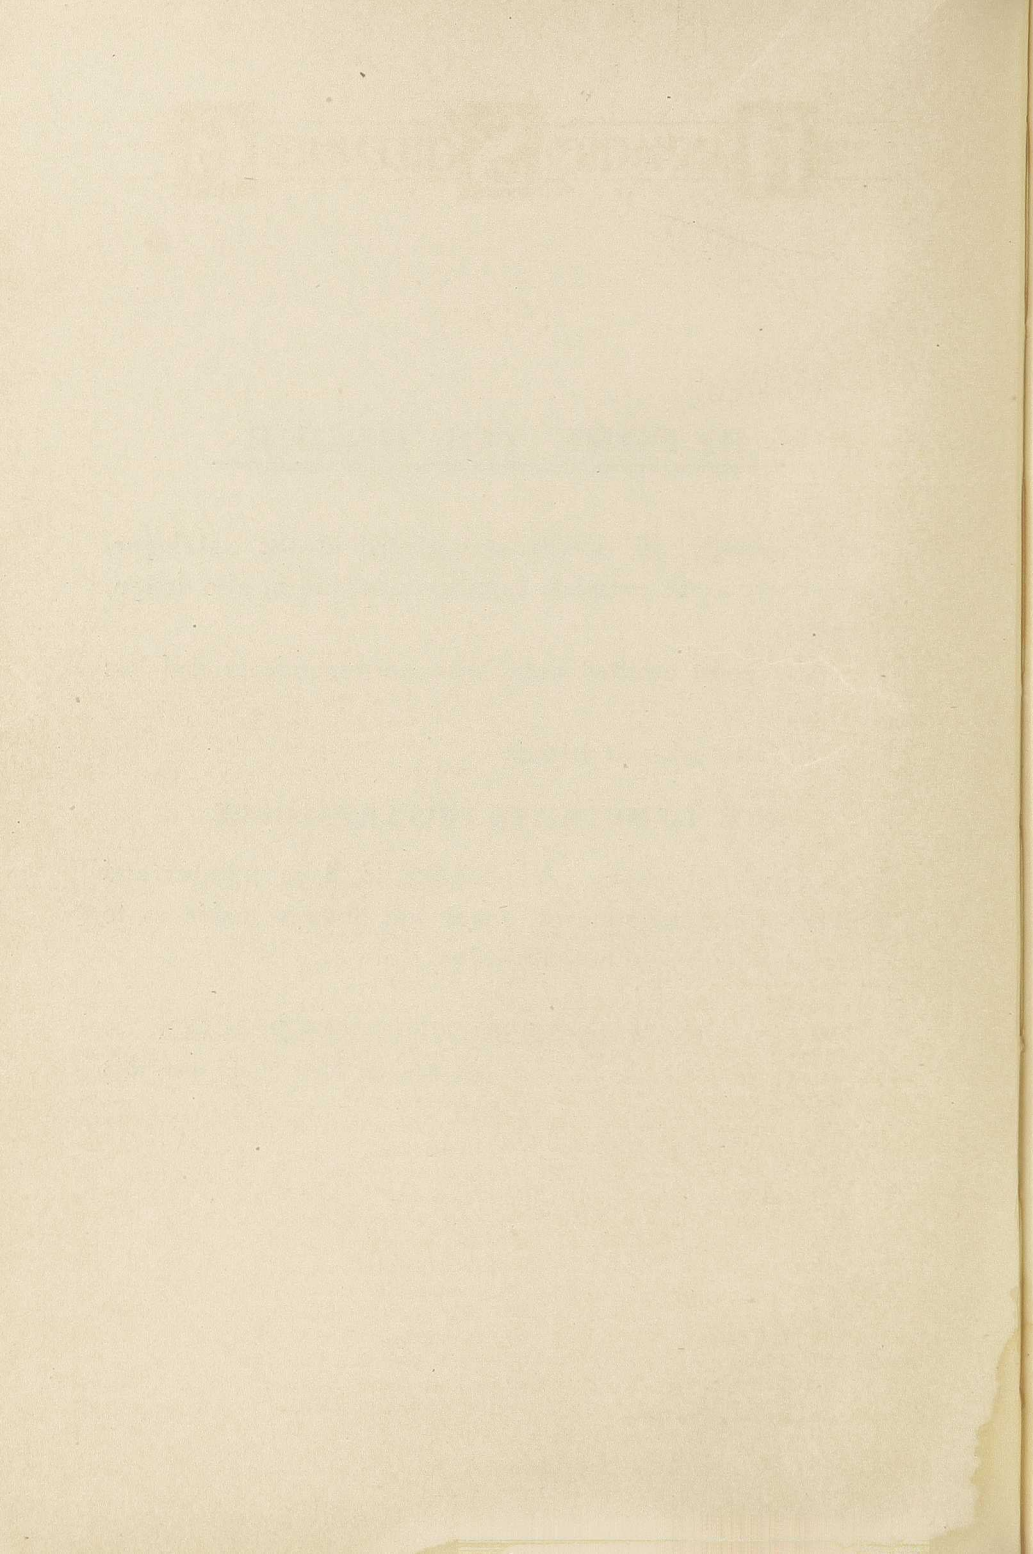

We also ask our friends

NOT TO MUTILATE THIS CATALOGUE

by tearing out pages. A reference to page number and number and description of goods will always enable us to trace any item without difficulty.

HAMMACHER, SCHLEMMER & CO.

209 Bowery, New York, since 1848

HAND OF DOORS.

The cut and descriptions on this page conform as nearly as possible to the general usage of the trade, and apply to all the Locks in this Catalogue.

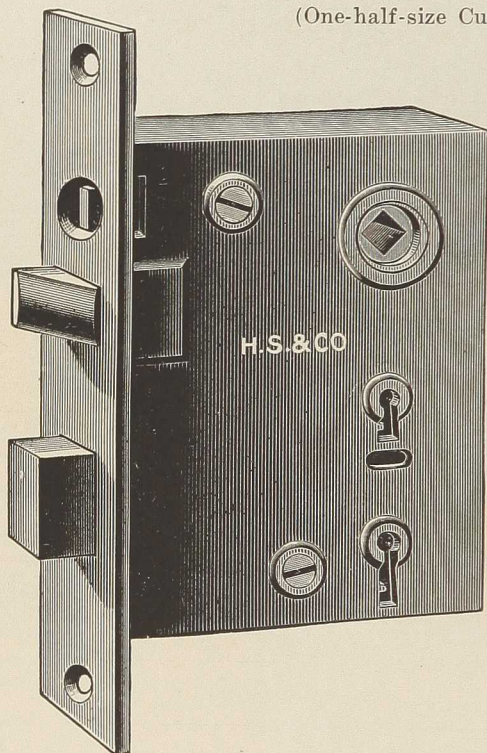

In ordering Locks (except those that are reversible), it is

IMPORTANT THAT THE HAND OF DOOR BE GIVEN.

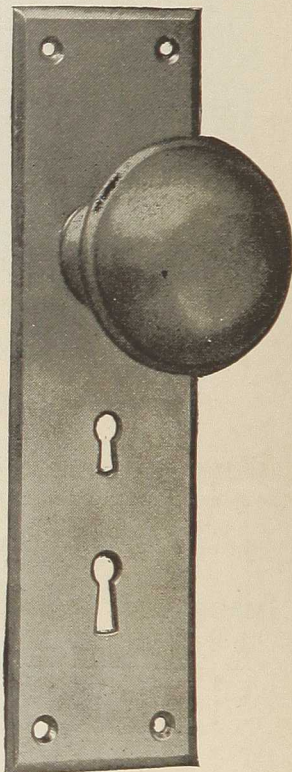

CUT	KIND OF DOOR	KIND OF LOCKS
1	Right Hand.	Right Hand Locks.
2	Right Hand Reverse Bevel.	Right Hand Reverse Bevel Rim Locks. " " " " " Night Latches. " " " " " Mortise Night Latches. Left " Mortise Knob Locks.
3	Left Hand.	Left Hand Locks.
4	Left Hand Reverse Bevel.	Left Hand Reverse Bevel Rim Locks. " " " " " Night Latches. " " " " " Mortise Night Latches. Right " Mortise Knob Locks.

FRONT DOOR LOCK SETS.

(One-half-size Cuts.)

No. 1230. Lock.

No. 1583. Knob.
No. 2589. Escutcheon.

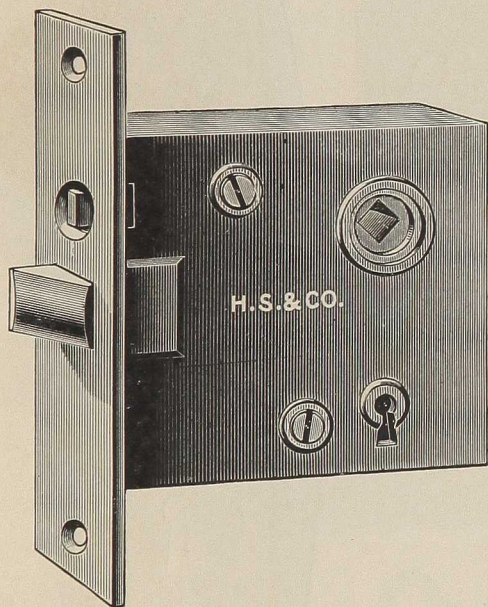

No. 2596½. Escutcheon.

Set No. F100.

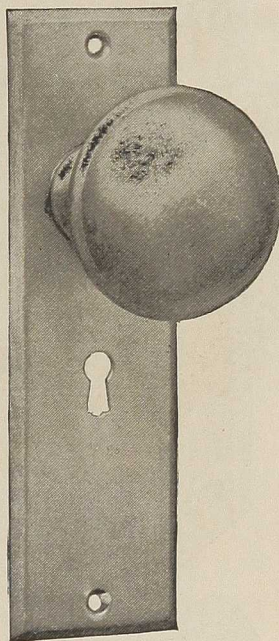

For description see page 36.

CHICAGO SPRING BUTTS.

The spring is always concealed when the door is closed.

Double Acting.

Wrought Steel.

No. 1½. For ⅞ to 1 in. Doors. Japanned.

No. 31½. For ⅞ to 1 in. Doors. Bronze Plated and Polished.

No. 31½. For 1⅛ to 1¼ in. Doors. Bronze Plated and Polished.

No. 131½. For ⅞ to 1 in. Doors. Bronze Plated, not Polished.

No. 131½. For 1⅛ in. to 1¼ in. Doors. Bronze Plated, not Polished.

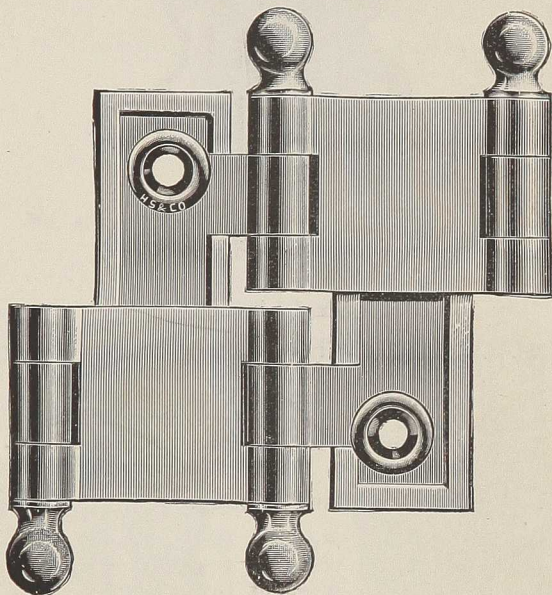

A pair of Spring Butts are intended for each door, but when doors are light, one Spring Butt at the top and one Blank Butt at the bottom will work very well. Never put the Blank Butt at the top of the door. Be particular to hang them in perpendicular line.

Blank Butts are illustrated on the following page.

See Price List.

CHICAGO BLANK BUTTS.

Double Acting.

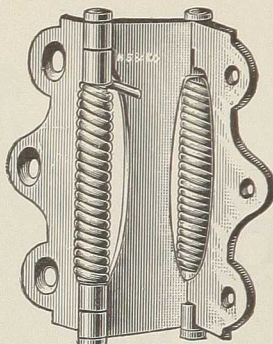

Wrought Steel.

- No. 3½. For 7⁄8 to 1 in. Doors. Japanned.
- No. 33½. For 7⁄8 to 1 in. Doors. Bronze Plated and Polished.
- No. 33½. For 1½ to 1¼ in. Doors. Bronze Plated and Polished.
- No. 133½. For 7⁄8 to 1 in. Doors. Bronze Plated, not Polished.
- No. 133½. For 1½ to 1¼ in. Doors. Bronze Plated, not Polished.

Blank Butts should always be put at the bottom of the Door.

See Price List.

McCABE'S PARLOR DOOR HANGERS.

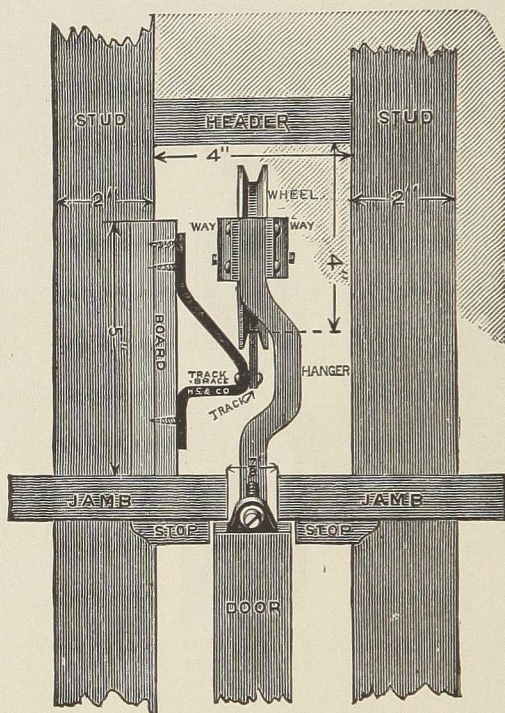

**No. 2 Special.
With Steel Wheels.**

This hanger is absolutely noiseless, easily attached, simple in construction and has ball bearings. All parts are case-hardened. The Bearings are constructed with the same care as those in bicycles, thereby reducing friction to a minimum. The track is made of cold drawn steel, with a parallel slot having flanges on both sides. The inside surfaces of the track in which the ball-bearing carriages travel are as smooth as it is possible to make them. There is an adjustment on the track so that the doors may be readjusted at any time.

LANE'S "STANDARD" PARLOR DOOR HANGERS.

The Lane Standard Parlor Door Hanger is made entirely of steel, except the silent tread of wheel. It is thoroughly well made and guaranteed.

For Double Doors.

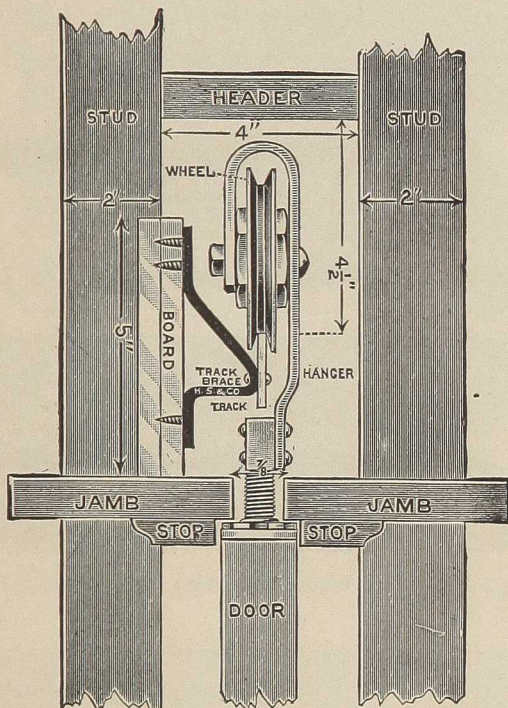

Each door to slide four feet or less. Set contains four hangers, 14 feet of track, gravity stops, striking plates, floor guides, and all screws.

For Single Doors.

For door to slide four feet or less. Set contains two hangers, 8 feet of track, and all necessary fixtures.

See Price List.

LANE'S "NEW CHAMPION" PARLOR DOOR HANGERS.

Made of steel, excepting the wheel, which is of iron. Has anti-friction roller bearings and is adapted to any length of run.

The adjusting nut extends through the base plate and has a serrated projecting flange, both above and below, by which it may be turned.

For Double Doors.

Set contains four hangers, 14 feet of 1 in. track, gravity stops, striking plates, floor guides, and all screws.

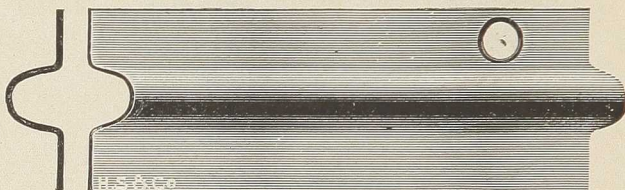

For Single Doors.

Set contains two hangers, 8 feet of 1 in. track, and all necessary fixtures.

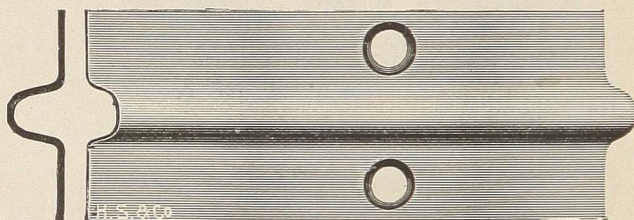

See Price List.

DUMBWAITER FIXTURES.

SPRINGFIELD.

The Springfield Dumbwaiter Fixture is adapted to all kinds of dumbwaiters where loads under 300 lbs. are to be carried.

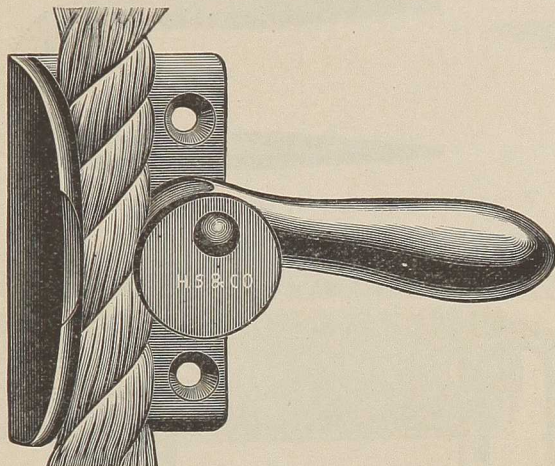

The illustration shows the fixtures in position. There are no forked rimmed wheels, rollers, ratchets, or cogs which are ordinarily used on hand elevators, thus doing away with countless wearing parts.

The weight of the fixture is 25 lbs., diameter of large wheel, $12\frac{1}{2}$ in., and of small wheels 3 and 4 in..

Each set contains 5 small pulleys and 1 large wheel, with full directions for erecting, enabling every person to easily put them up.

See Price List.

DUMBWAITER ROPE CLAMPS.

No. 2. Japanned. For $\frac{1}{2}$ or $\frac{5}{8}$ in. Rope.

In bulk or $\frac{1}{2}$ lb. papers.

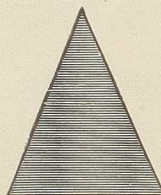

PANEL POINTS.

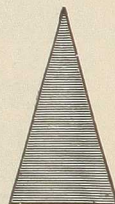

$\frac{1}{2} \times 1\frac{1}{4}$ in.

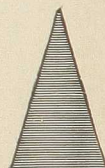

$\frac{3}{4} \times 1$ in.

$\frac{3}{4} \times \frac{7}{8}$ in.

$1\frac{1}{2} \times \frac{7}{8}$ in.

$\frac{7}{16} \times \frac{3}{4}$ in.

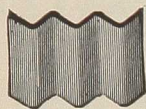

No. 17 English Standard Gauge. In bulk or 10-lb. boxes.

See Price List.

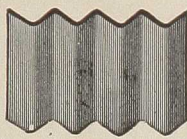

CORRUGATED STEEL FASTENERS.

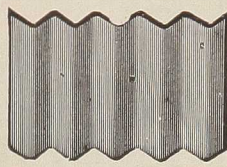

$\frac{1}{4}$ in. No. 2.

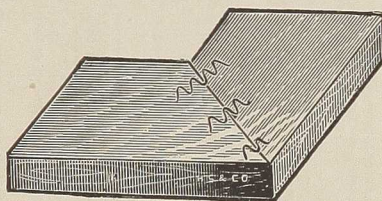

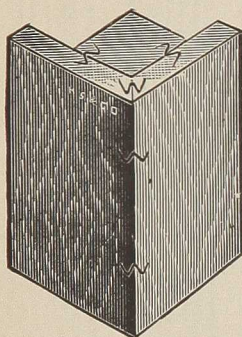

$\frac{3}{8}$ in. No. 3.

$\frac{1}{2}$ in. No. 4.

$\frac{5}{8}$ in. No. 5.

Illustrations show method of fastening.

It is unnecessary to call the attention of the practical manufacturer and mechanic to the many uses to which this simple device can be put, as we believe its manifold advantages can be seen at a glance, while its low price commends it in numberless instances as a cheap and efficient substitute for glue, dowels, nails, screws, etc.

PRICES PER THOUSAND

Number of Corrugations	Inches in Depth						
	$\frac{3}{16}$ & $\frac{1}{4}$	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	$\frac{7}{8}$	1
2	\$0.45	\$0.55	\$0.60	\$0.80	\$0.90	\$1.00	\$1.15
3	.60	.75	.80	1.00	1.15	1.35	1.45
4	.75	.95	1.00	1.25	1.45	1.75	1.85

ELECTRIC CALL BELL OUTFIT.

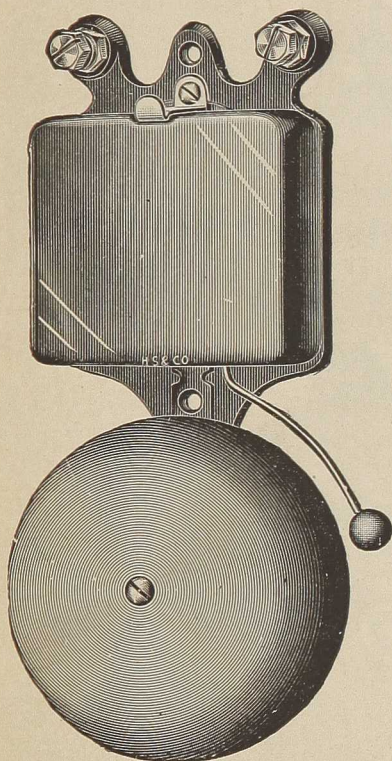

No. 1. This set contains

- One Iron Box Bell, 2½ in. gong.
- One cell Dry Battery.
- One Wooden Push Button.
- Fifty Feet Insulated Wire.
- Necessary Staples.

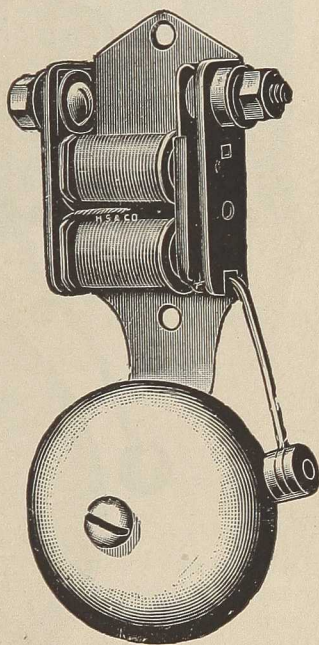

Full instructions are packed with each set.

See Price List.

ELECTRIC BELLS.

No. 189.

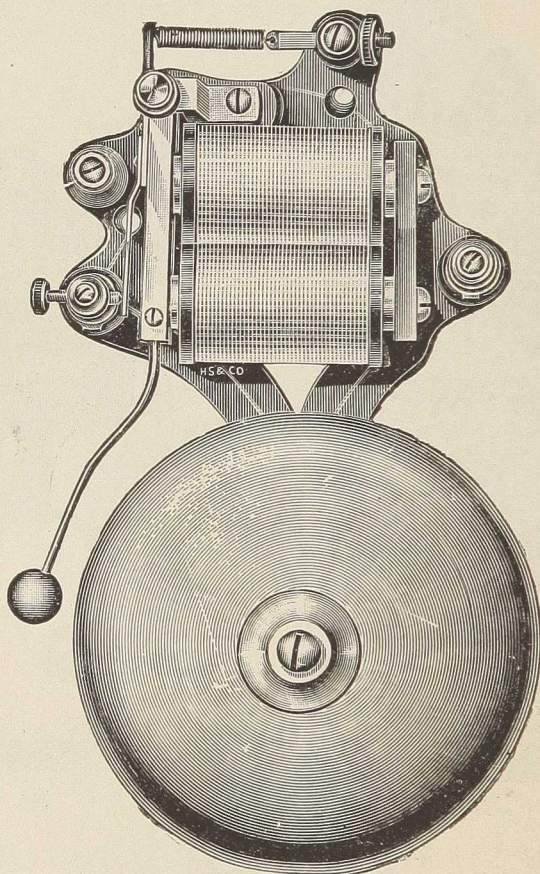

No. 18.

- No. 189. $2\frac{1}{2}$, 4, and 5 in. Japanned Iron Box, Nickel-plated Gong. Pivoted Armature, Double Adjustment.
- No. H. $2\frac{1}{2}$ in. Style of No. 2, but with Dome Gong.
- No. 18. $1\frac{3}{4}$ in. Nickel-plated Box and Gong.

See Price List.

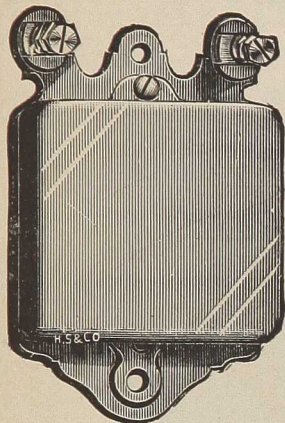

ELECTRIC BELLS.

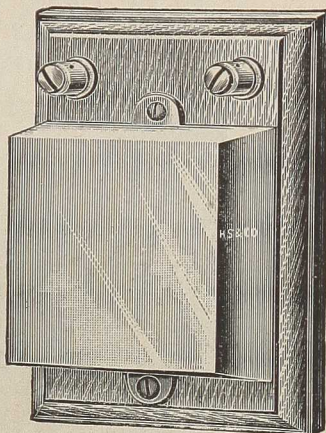

No. 6. 4, 5, 6, and 8 in. Japanned Iron Frame, Cast Bell Metal Gong,
Nickel Plated. Pivoted Armature.

See Price List.

BUZZERS.

Style H.

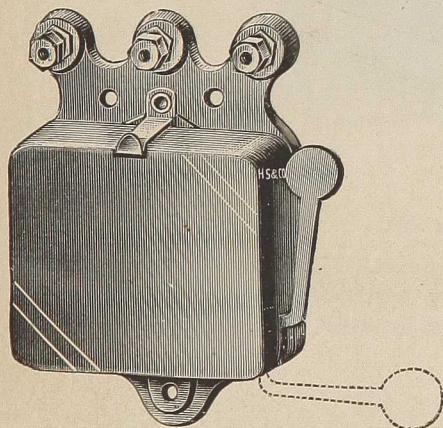

Style C.

Style C. Wood Base, Nickel-plated Cover, and Binding Posts.

Style H. Iron Box, Nickel-plated Cover, Pivoted Armature, Double Adjustment.

AUTOMATIC DROPS.

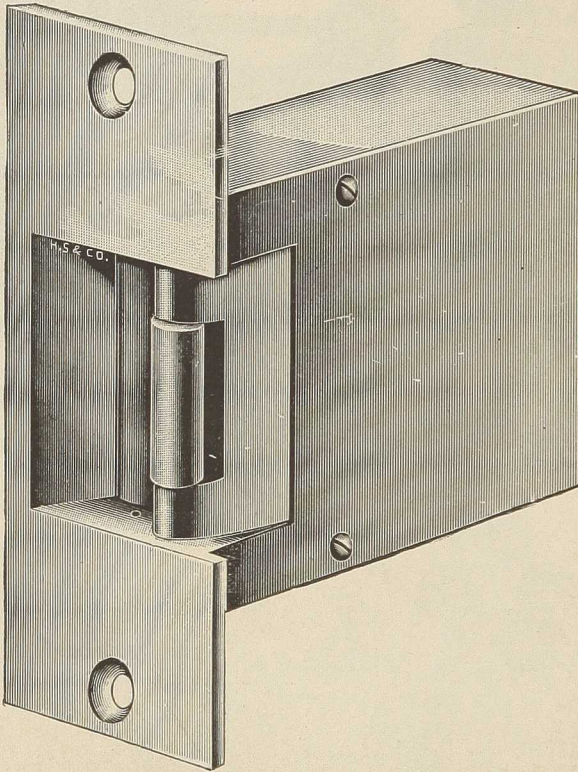

Style B. Iron, Japanned.

These Drops are used for closing a bell circuit automatically, and holding it closed as long as desired. Placed in a bell circuit, when the circuit is closed by a push button or a door or window spring, the circuit closer drop, operated by an electro-magnet, falls and holds the circuit until it is raised again.

See Price List,

See Price List.

Important.

GLASS KNOBS.

GLASS KNOBS (excepting those having D and S added to numbers) are regularly made with $\frac{5}{16}$ in. spindle. They can be made with $\frac{12}{16}$ in. shank to fit any of the escutcheons shown in this catalogue at an additional cost. (See Price List.) They can also be furnished with a closet spindle or with spindle to receive metal knob on one end.

The smaller sizes of Glass Knobs (having the letters D and S added to numbers) are fastened with a machine screw.

In our Price List we only give prices for Brass and Bronze Polished and Old Brass Finish Trim, although we can furnish any other finish wanted at a slight advance in price.

IN ORDERING, it is important to give finish wanted, thickness of door, and whether or not to fit an escutcheon. We will always send knobs with regular $\frac{5}{16}$ in. spindle unless ordered otherwise.

HAMMACHER, SCHLEMMER & CO.,

209 Bowery, New York, since 1848.

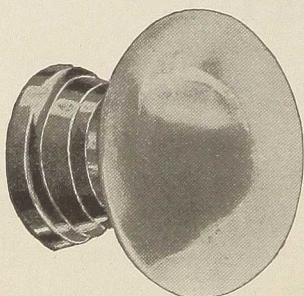

**MEASUREMENTS OF
GLASS KNOBS.**

DOOR, about $2\frac{1}{4}$ in.

See Price List,

WE are also very large handlers of the following lines:—Cabinet, Piano, Refrigerator and Bar Hardware; Tools for all Trades, including Machinists' and Metal Workers' Tools, Carpenters' and General Wood Workers' Tools, Piano Tuners' and Wood Carvers' Tools, and for several years have made a specialty of Tools and Benches for Manual Training and Technical Schools.

We issue separate catalogues of nearly all these lines, which we distribute upon reasonable terms—write for particulars.
